

100 DAY AGENDA

The New Democrat Coalition is focused on ending the pandemic, creating jobs, and solving the challenges of the 21st Century. In the first 100 days, the NDC will fight for durable progress on some of our nation's most pressing issues and greatest opportunities so that America leads into the future. The NDC shares the Biden-Harris Administration's vision to build back better and we will work together to move our country forward.

THE FOUR PILLARS

1. End the pandemic and get people back to work

New Dems will work to end the pandemic and reopen schools and our economy safely; protect workers, families, and local businesses; help the hardest hit, especially communities of color; and stimulate the economy.

2. Modernize our infrastructure, combat climate change, and create jobs

New Dems will work to update our transportation infrastructure; create quality jobs; tackle climate change; build our clean energy future; invest in our nation's preparedness and resilience; develop more affordable housing; and close the digital divide.

3. Protect and expand Americans' health care

New Dems will work to build on the Affordable Care Act to ensure people are protected from high health care costs, everyone is covered, and care is easier to access.

4. Restore American global leadership

New Dems will take immediate action to reengage in the international community as a dependable global leader and ally; bolster democracy and renew faith in government; lead with a smart and targeted national security strategy; enact a trade agenda that works for American workers, farmers, and businesses; and build a fair and inclusive immigration system and work to enact comprehensive immigration reform.
