

- **H.R. 2013: The Information Transparency & Personal Data Control Act – Rep. Suzan DelBene**
 - This bill will give people control over their most sensitive information and improve enforceability. This legislation requires the Federal Trade Commission (FTC) to mandate disclosure from companies on what information they are collecting and why, especially if it is being shared with another party. This bill has 25 cosponsors.
- **H.R. 827: AI JOBS Act – Rep. Darren Soto**
 - This bill will authorize the Department of Labor to work with businesses and educational institutions to create a report analyzing the future growth of artificial intelligence and its impact on American workforce.
- **H.Res.153 – Rep. Brenda Lawrence**
 - AI has the potential to transform the economy and dramatically alter industries including health care, retail, finance, energy, transportation, law, education, and manufacturing over the coming years. This resolution will support the development of guidelines for ethical development of artificial intelligence in consultation with diverse stakeholders.
